

Kidubar Information and Instructions

(A video of instructions can be viewed on www.kidubar.com)

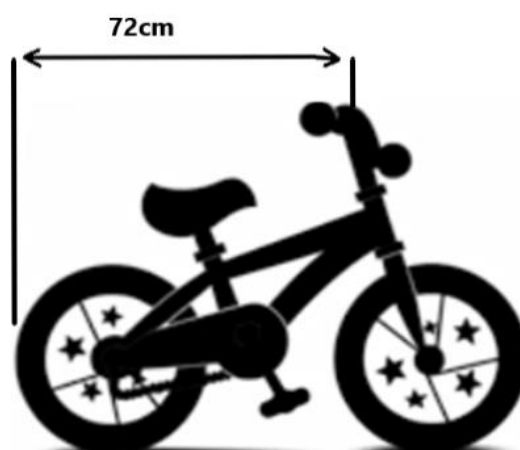

TERMS OF USE:

- a) All sports equipment inherently has risk associated with use. The **kidUbar** is no different and there is an onus on the parent, guardian or any other person, using the **kidUbar** with a child on the bicycle connected to the **kidUbar**, to act with care and responsibility. The **kidUbar** should be used within the normal range of activities considered for a small child's bicycle, with special consideration to terrain, traffic, other persons and environment, as examples.
- b) The **kidUbar** should be connected to a bicycle it is designed to fit – being a child's 14" with handlebar style and measurements as shown in the Step 1 handlebar diagram below.

BEFORE YOU BUY:

HANDLEBAR

Technically the kidUbar optimally designed to fit a child's 14" bicycle with measurements as indicated the above diagram and as per the below specifications:

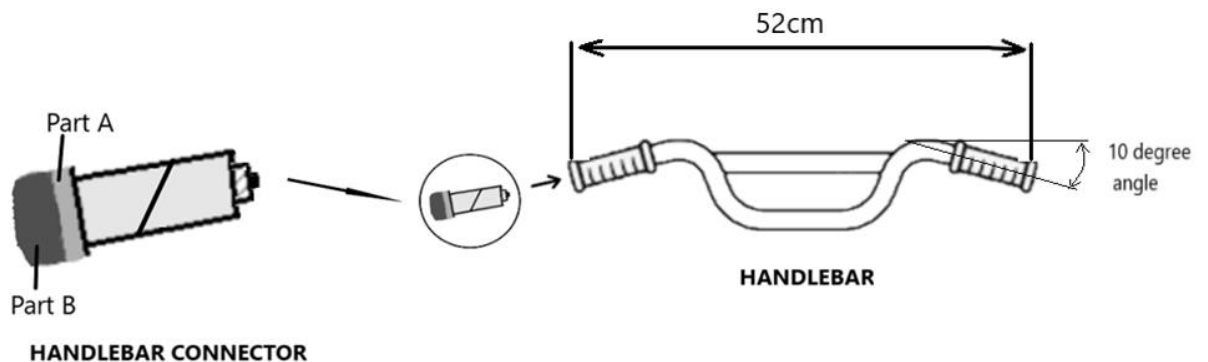

- (i) Handlebars are mountain bicycle style and not childrens' bull horn style.

(ii) Measurement of the handlebars from grip end to grip end should be between 52cm – 58cm.

(iii) Measurement horizontally from the stem of the bicycle handlebars to the furthest point of the rear wheel should be 72cm to 74cm.

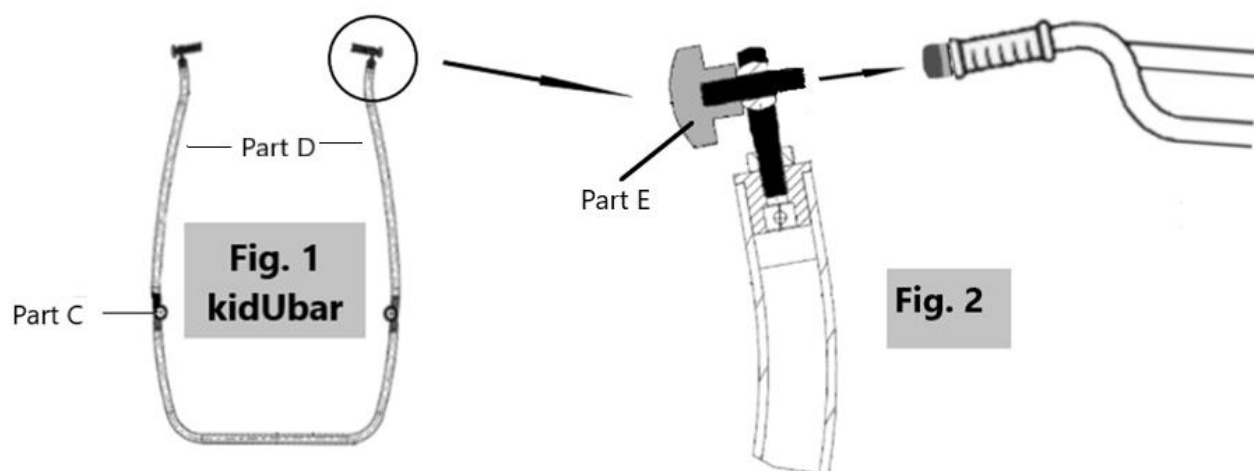

HOW TO INSTALL AND ATTACH:

Step 1 : Inserting handlebar connectors into the bicycle

- Using a sharp cutting tool (such as a Stanley knife) cut out both ends of the handlebar grips exposing the inside of the handlebar.
- Insert the handlebar connector fully into the now open ends of the handlebar.
- Holding Part A tighten the handlebar connector into the handlebars by turning Part B.
- Ensure the handlebar connector is firmly secured inside the handlebar.
- Once inserted into both ends of the handlebars, **the handlebar connectors are not removed.**
-

Step 2 : Attaching the kidubar to the bicycle

- The **kidubar** can now be attached to the bicycle handlebars for use.
- Attach the pieces (Part D) to assemble the **kidubar** as shown in Fig.1, securing with the provided hand bolts (Fig.1 - Part C)

- In attaching Part D ensure Part E correctly faces inward to allow screwing into the handlebars.
- Attach the **kidubar** (Fig.1) into the handlebars (Fig.2), by inserting and screwing the hand knob bolts (Fig.2 - Part D).
- Ensure Part E is securely tightened.
- To remove the **kidubar** from the bicycle simply unscrew Part E.
